## **DETAILED ACTION**

Applicants' response to the restriction requirement electing group I with the further election of the species of example 11 is noted. No traverse is noted and the restriction is maintained for reasons of record.

Accordingly, claims 11,14,19,23-37,48-53 and 55-66 have been withdrawn from consideration as being directed to non-elected subject matter.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,6,7,11, 12, 14, 15, 19, 21,22, 38, 39 and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al WO 02/100358.

Walker et al teach corresponding azabicyclo indazole compounds. X is O, R<sub>1</sub> is hydrogen, the azabicyclo is formula I, W<sup>0</sup> is formula where V-Y-Z is N-N-C, W is CR<sub>6</sub> is H and W<sup>0</sup> is substituted with lower cycloalkyl (read cyclopropyl).

Walker et al differs in that the azabicyclo moiety is attached at the 5 position instead of at the 3, 4 or 7 position as recited in applicants' claims. However, the compounds of Walker et al are closely related structural isomers of those claimed. The Courts have conclusively established, per In re Norris, 84 USPQ 458, that structural isomers have defined predictable physical properties, and novel and useful chemical compound which is isomeric with compounds of the prior art are not patentable. Nothing unobvious is seen in substituting the known claimed isomer for the structurally similar isomer, since such structurally related compounds suggest one another and would be expected to share common properties absent a showing of unexpected results. In re Norris, 84 USPQ 458 (1950).

Further as to the HCL salt of claim 38, see page 25 line 26.

No claim is allowed.
